### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION*****Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 5 and 9 have been rejected under 35 U.S.C. 102(b) as being anticipated by Lynch, 5187843. Lynch discloses the claimed invention as shown in the annotated drawings.

Art Unit: 3677

Lynch also discloses that the fastening can be disengaged by sliding the groove and the protrusion relative to each other. The bottom of column 7 and the top of column 8 discusses the addition of ridge 390 to prevent the groove and protrusion from sliding apart and disengaging from one another. This makes it absolutely clear that Lynch's device is capable of performing the intended functions.

3. Claims 3-8 have been rejected under 35 U.S.C. 102(b) as being anticipated by Ausnit, 3325084. Ausnit discloses a fastener with a plurality of protrusions and grooves (figures 5-9) on an envelope, box or pouch (col. 1, lines 25-26). Wherein all of the different embodiments of the fastener are capable of performing the intended function of disengagement.

Applicant's arguments filed 6/19/2008 have been fully considered but they are not persuasive. The applicant argues that neither Lynch nor Ausnit disclose the protrusion and groove are of shapes which prohibit the engagement of the protrusion and the groove from being canceled by pressures in directions **opposite** to the pressing directions for the engagement. Both Lynch and Ausnit disclose the protrusion and groove having shapes that would prevent the cancellation of the engagement between the protrusion and groove. Both fasteners are of the press and seal type fastener with hooks that engage grooves. Both resist the disengagement between the protrusion and groove by a certain amount of pressure applied in directions opposite to the pressing directions for the engagement. Furthermore, Lynch shows disengagement by pressures that are not opposite to the pressing directions for the engagement and therefore meet the limitations of the method claims.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
